2024 Ram 3500

WE DELIVER ANYWHERE IN CANADA!

Serious strength starts here. The 2024 Ram 3500 Tradesman is built for hard work, heavy loads, and long days on the job. This heavy duty pickup delivers the durability and capability drivers depend on when the work gets demanding.

On the outside, the Ram 3500 features a bold grille, strong body lines, and a commanding stance that reflects its heavy duty purpose. The durable truck bed is ready for tools, equipment, and materials, making it a reliable partner for job sites and hauling tasks.

Under the hood, the powerful engine lineup is designed for serious performance. Equipped with a Cummins Turbo Diesel, the Ram 3500 delivers exceptional torque and towing strength. Paired with a heavy duty automatic transmission and a rugged suspension system, it is built to handle demanding payloads and large trailers with confidence.

Inside, the Tradesman trim focuses on functionality and durability. The cabin offers comfortable seating, easy to clean materials, and a practical dashboard layout that keeps important controls within reach. Smart storage compartments provide space for tools, paperwork, and everyday essentials.

Technology adds convenience to the workday. The Uconnect infotainment system includes a touchscreen display with Bluetooth connectivity for hands free communication and audio streaming. USB ports allow easy charging for devices while on the job.

Safety features help support control and awareness when the truck is working hard. Trailer sway control, stability control, traction control, a rear view camera, and multiple airbags work together to enhance confidence when towing or maneuvering heavy loads.
