2019 Nissan LEAF

The 2019 Nissan Leaf SL in striking red offers a perfect combination of modern electric vehicle technology, premium comfort, and eco-conscious performance, with the added benefit of just under 76,000 km on the odometer, showcasing its well-maintained history. As the top-tier trim for the Leaf lineup, the SL brings elevated refinement and advanced features that make it stand out among electric vehicles in its class.

From the outside, the bold red finish enhances the Leaf’s sleek, aerodynamic body lines, while the signature V-Motion grille and sharp LED headlights give it a confident, high-tech appearance. The 17-inch alloy wheels add a touch of sportiness, and the integrated LED daytime running lights, heated outside mirrors with integrated turn signals, and subtle chrome accents complete its upscale look. This is a vehicle designed to turn heads while silently gliding through city streets.

Step inside, and the SL trim reveals its premium nature. Leather-appointed seats provide a plush, supportive ride, with the driver’s seat featuring power adjustment and lumbar support for long-distance comfort. Heated front and rear seats, along with a heated leather-wrapped steering wheel, ensure year-round driving comfort, especially in colder climates. The cabin is also designed for convenience and technology, featuring a 7-inch NissanConnect infotainment display with built-in navigation, Apple CarPlay, and Android Auto. The Bose premium audio system delivers exceptional sound quality, enhancing every journey with crisp, immersive audio.

Under the hood — or rather, under the floor — lies the Leaf’s 40 kWh lithium-ion battery paired with an efficient electric motor producing 147 horsepower and 236 lb-ft of instant torque. This setup delivers smooth, responsive acceleration, making city driving effortless and highway merging confident. With an estimated range of up to 150 miles (approximately 240 km) on a full charge, it’s ideal for daily commutes and weekend trips alike. The SL trim comes with both a portable trickle-charge cable for home use and a Quick Charge port, enabling rapid charging at compatible public stations to get you back on the road faster.

The 2019 Leaf SL is also packed with Nissan’s most advanced driver assistance features, including ProPILOT Assist, which helps maintain lane position and safe following distances in highway traffic. The Intelligent Around View Monitor provides a 360-degree view for stress-free parking, while Blind Spot Warning, Rear Cross Traffic Alert, and Intelligent Emergency Braking with Pedestrian Detection add an extra layer of safety.
