2023 Hyundai Kona Electric

Experience the future of driving today with this 2023 Hyundai Kona Electric Preferred FWD — a stylish, fully electric SUV that delivers instant performance, zero emissions, and impressive range without compromising on comfort or capability. The Kona Electric embodies everything modern drivers are looking for: forward-thinking technology, sleek design, and the freedom to drive past the gas station for good.

From the outside, the Kona Electric commands attention with its bold yet refined styling. Its aerodynamic lines, distinctive closed front grille, and LED lighting give it a futuristic, premium look that matches its advanced electric powertrain. Sleek alloy wheels and a confident stance highlight its urban versatility, while compact proportions make it effortless to maneuver through city streets or tight parking spaces. This is electric done right — modern, efficient, and undeniably fun.

Inside, the Kona Electric Preferred offers a refined and tech-focused cabin designed to make every drive relaxing and connected. The quiet, all-electric powertrain creates a peaceful environment, enhanced by high-quality materials and thoughtful design. Heated front seats, a heated steering wheel, and automatic climate control ensure year-round comfort, while the supportive seating and generous legroom make long drives a pleasure. The smartly designed cargo space provides plenty of room for daily errands or weekend adventures, proving that practicality and sustainability can go hand in hand.

Technology is at the heart of the Kona Electric experience. A crisp 10.25-inch touchscreen display features built-in navigation, Apple CarPlay, and Android Auto, keeping you seamlessly connected on the go. The digital instrument cluster provides clear, real-time information about range, efficiency, and performance. With keyless entry, push-button start, wireless phone charging, and multiple USB ports, the Kona Electric makes convenience feel effortless.

Under the hood — or more accurately, beneath the floor — lies Hyundai's advanced 64 kWh battery and 150 kW electric motor, delivering an impressive 201 horsepower and an estimated range of over 400 kilometres on a full charge. Instant torque provides smooth, quiet acceleration that feels both responsive and exhilarating, while regenerative braking helps maximize efficiency and extend range. The Kona Electric's low center of gravity and precise steering make it agile and composed, giving you confidence whether you're navigating city streets or cruising the highway.
