Reviews:

\* When it comes to handling, agility and responsiveness, the ATS seems to have impressed the majority of its owners, many of whom report the feel of the ATS as its best asset. Handling is top-notch, ride quality on most models is highly rated, and the car is said to offer a solid, dense and substantial feel. A quiet ride and a comfortable cabin round out the package, and the hidden storage compartment behind the central control panel is an oft-praised touch. ATS's fast-acting and highly effective all-wheel-drive system is also favoured by owners who have that option, and your correspondent's test drive notes, on two separate occasions, mention excellent performance from the available xenon lighting system.
