2020 Nissan Qashqai

For drivers seeking a sophisticated, fully-loaded compact SUV with year-round capability and exceptional value, this white 2020 Nissan Qashqai SL AWD is a standout choice. With just under 95,000 kilometers on the odometer, this top-trim Qashqai blends upscale features, refined styling, and confident performance into a compact, city-friendly footprint — perfect for commuters, small families, or anyone looking to elevate their daily drive without sacrificing practicality or fuel economy.

Under the hood, you'll find Nissan's proven 2.0L DOHC 4-cylinder engine delivering a balanced 141 horsepower and 147 lb-ft of torque — enough to feel responsive in traffic while remaining exceptionally fuel-efficient. Paired with an Xtronic CVT (Continuously Variable Transmission), the powertrain delivers smooth, linear acceleration and efficient cruising on highways. The intelligent all-wheel drive system automatically adjusts power delivery between the front and rear wheels, helping to maintain traction through wet, snowy, or slippery road conditions — giving you peace of mind in any season.

Being the SL trim, this Qashqai represents the pinnacle of luxury and convenience in the lineup. Inside, you're greeted by premium leather-appointed seating, a power-adjustable driver's seat with lumbar support, and heated front seats — all designed to keep you comfortable no matter the season. The cabin offers a quiet, well-insulated environment with quality materials and a modern design that makes daily driving feel more like a premium experience. Dual-zone automatic climate control ensures both driver and passenger can ride in personalized comfort.

Technology takes center stage with the Qashqai SL. A full-featured 7-inch touchscreen with built-in navigation, Apple CarPlay, and Android Auto keeps you connected and in control. Voice command functionality, Bluetooth connectivity, and a crisp rearview camera all come standard, while the available Around View Monitor offers a 360-degree bird's eye view for effortless parking and maneuvering in tight spaces. The digital information display in the instrument cluster also keeps critical vehicle and trip data front and center.

On the safety front, Nissan's suite of Intelligent Mobility features comes standard on the SL trim. This includes ProPILOT Assist — a semi-autonomous driving aid that combines adaptive cruise control with lane centering — ideal for reducing fatigue on long commutes or highway drives. You'll also benefit from Intelligent Emergency
