2016 Hyundai Tucson

The 2016 Hyundai Tucson SE AWD in classic black offers a smart, reliable, and well-equipped compact SUV experience, blending all-weather capability with surprising comfort and space. With just over 156,000 kilometers, this Tucson has been well-traveled but continues to shine with Hyundai’s renowned dependability, modern design, and impressive feature set for its class and year.

Powering this SE trim is a 2.0-liter 4-cylinder engine paired with a 6-speed automatic transmission, delivering a well-balanced 164 horsepower and 151 lb-ft of torque. This drivetrain is tuned for smooth operation and excellent drivability, whether you’re navigating city streets or heading out on the highway. The All-Wheel Drive system adds a layer of confidence in rain, snow, and gravel, making it a dependable companion for Canadian conditions year-round. Fuel economy remains competitive for an AWD SUV, rated at approximately 11.0 L/100km in the city and 9.1 L/100km on the highway, helping to keep ownership costs manageable.

The black exterior gives this Tucson a clean, modern look with a hint of sophistication. The body is styled with Hyundai’s signature fluidic sculpture design, giving it a sleek yet athletic presence on the road. Stylish 17-inch alloy wheels, LED daytime running lights, and a bold front grille add to its appeal, while the raised ride height offers both better visibility and ground clearance for uneven roads or snowy parking lots.

Inside, the SE trim focuses on comfort and convenience, offering heated front seats, a 6-way adjustable driver’s seat, and premium cloth upholstery that’s both soft and durable. The cabin is spacious and well-laid out, with generous legroom and headroom for passengers in both rows. With rear seatbacks that fold 60/40, cargo flexibility is excellent—ideal for road trips, groceries, sports gear, or weekend DIY runs.

Technology-wise, the 2016 Tucson SE comes equipped with a user-friendly 5-inch touchscreen infotainment system with Bluetooth, USB and AUX connectivity, and a rearview camera for safer reversing and tight parking situations. Steering wheel-mounted audio and phone controls let you stay connected without distraction, and air conditioning with rear seat vents ensures a comfortable cabin for all passengers.
