2022 Ford Super Duty F-250 SRW

Finished in clean white and built to outperform, this 2022 Ford F-250 Super Duty SRW with 4x4 and a flatdeck bed is the kind of truck that doesn't just show up—it shows off what it can do. With just under 69,000 kilometers, it represents a rare combination of low mileage, powerful diesel performance, and true workhorse utility. Whether you're hauling heavy equipment to a jobsite, towing a trailer through the mountains, or navigating a rural property with payload in tow, this F-250 is built to handle it with grit, confidence, and enduring strength.

Under the hood lies the heart of this machine: the legendary 6.7L Power Stroke V8 Turbo Diesel engine. Delivering a muscular 475 horsepower and a staggering 1,050 lb-ft of torque, this powerhouse is engineered to move massive loads with effortless torque delivery and ultra-smooth operation. It's mated to Ford's durable 10-speed TorqShift automatic transmission, which optimizes shift timing for performance and fuel economy across a wide range of towing and hauling conditions. This transmission also enhances drivability when unladen, making the F-250 surprisingly refined during daily driving—whether you're on the highway or crawling around a jobsite.

Equipped with a flatdeck, this F-250 transforms from a traditional pickup into a purpose-driven tool that can adapt to almost any trade or need. The flatbed layout provides more usable cargo space than a conventional box, allowing for easier loading of pallets, oversized tools, tanks, or irregular materials. Stake pockets, tie-downs, and integrated headache racks come with this setup, giving you instant utility and readiness for hauling equipment, lumber, or machinery. It's an ideal platform for construction, agriculture, landscaping, and trades requiring more flexibility and payload access than a standard box truck could offer.

Speaking of payload, the F-250's configuration with this Power Stroke diesel allows for over 3,500 lbs of payload capacity, depending on upfit and rear axle ratios. That's more than enough for most heavy equipment and jobsite needs. Towing is where this truck truly flexes its muscles, with conventional towing capacity reaching up to 20,000 lbs and even more when equipped for fifth-wheel or gooseneck setups. With the 4x4 drivetrain, this truck doesn't hesitate when the road disappears—mud, gravel, snow, or rough terrain are no match for its heavy-duty suspension and locking rear differential, giving you the traction and control needed for any conditions.

The 2022 model year brought subtle refinements to the Super Duty lineup, enhancing comfort and technology while preserving the truck's hard-working DNA. Even in work-
